Sheboygan PAINT COMPANY

SOLUTIONS FOR THE

WASTE CONTAINER INDUSTRY

Efficient & Environmentally Friendly Finishing Solutions

With Sheboygan Paint Company High-Quality Coatings

For decades, Sheboygan Paint Company has been a leading manufacturer of water-reducible and solvent-borne coatings for industrial metal waste containers and equipment OEMs and refinishers.

We deliver paint solutions to some of the industry's most recognized companies. Working closely with them, we deliver precisely what they need to protect and beautify their waste and recycling containers, compactors, balers and other equipment. OEMs and refinishers appreciate our wide selection of standard industry colors and willingness to color-match to their exacting brand standards. They rely on the consistent application performance and proven environmentally conscious technologies of our waste industry products. Perhaps most important, our customers benefit from our national distribution capabilities and technical services. Our goal is to deliver quality products quickly and help our customers get the most value out of our coating solutions.

In switching to Sheboygan Paint Company quality coatings, our customers are impressed by the ease of application, strength of adhesion, fast drying properties and overall excellent flexibility of our products. We consistently meet or exceed standards set by our larger competitors. And, as a mid-sized manufacturer, we are nimble enough to make our customers a priority and powerful enough to provide the innovation and expertise needed to solve paint line problems.

"We're looking for speed and beauty. We build roll-off containers, so everything's fast. Rough and tough here. We don't have to do a lot of preparation with Sheboygan Paint Company coatings. I appreciate that it's once and done, on the box and go."

- Owner, Leading Waste, Shipping & Storage Container Manufacturer

Attributes

- Easy to Apply
- Fast Drying
- Economical
- High Gloss
- Surface Tolerant
- Environmentally Friendly
- Direct-to-metal Application
- Available in Any Color
- Lasting Protection
- Low Odor
- Low VOC
- Excellent Flexibility
- Superior Adhesion

Durable, Easy to Apply Waste Container Coatings that Look Great

Sheboygan Paint Company is recognized as a premier custom formulator of industrial coatings and an expert resource to solve nearly any paint line challenge. Through our innovative custom formulations, we have established a portfolio of high-quality products that provide a range of solutions to fit the specific needs of waste container OEMs and refinishers.

Our portfolio of quality products developed specifically for application on steel waste and recycling containers features water-reducible protective enamel coatings that are high gloss, low VOC, and fast drying. They are available across a full color spectrum. These alkyd coatings are intended for industrial finishing and refinishing applications that can be applied over primer or directly to metal by brush, roller, HVLP or air spray.

Sheboygan Paint Company's Key Products for the Waste Container Industry

Chemistry	Easy Application	Early Water Resistance	Low VOC	Fast Drying
Water-reducible Alkyd	Best	Good	Good	Good
